

Floor display FD4-CAN

FD4-CAN is a floor display with integrated voice announcer which is run through the CANopen-Lift bus system.

The unit presents floors, fixed maintenance messages and direction arrows through text and sound and it supports arrival chime in accordance with current EU norms and regulations. Audio files and configuration setup is easily stored onto a Micro SD memory card by using a computer and the CAN-wizard software.

If an FD4-CAN is powered up with an empty Micro SD card inserted, the unit will automatically copy the complete configuration onto the memory card. This enables the configuration to be transferred and copied between units with minimum effort.

FD4-CAN is also equipped with four programmable in- and outputs.

Please note! Mounting plate and speaker are not included.

Technical information

Floor display and voice announcer for CANopen-Lift in one unit

Micro-SD memory card slot

4 GB memory card included in delivery
