

SafeLine VA4 voice announcer

The voice announcer for playback of floor messages and music

The VA4 is a voice announcer with an internal memory for playback of floor messages and lift music, and often works as a supplement for an already existing floor display and speaker. The unit is easily mounted on a DIN-rail without any need for drilling.

The unit's integrated 2 MB memory has the capacity to store up to 240 seconds of speech and is compatible with the Windows-standard WAV, which gives the user great freedom in tailoring the unit's messages. The unit is configured very easily with the completely free of charge software SafeLine Pro, but can also be configured completely manually.

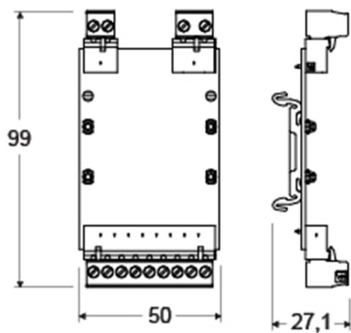

Technical information

Smooth installation on a DIN-rail
2 MB storage of voice messages
Easy configuration with SafeLine Pro

Included in package

Technical data

Power supply: 24V

Current consumption: 50mA

: 20-30 VDC positive/negative voltage.

Inputs: 20-30 VDC positive/negative voltage.

Size (HxWxD): 99 x 50 x 27,1mm

Weight: 100g
